Latest Certification Exam Questions & Braindumps - Prep4Away

Exam : **H35-210_V2.5-ENU**

Title : **HCIA-Access V2.5**

Vendor : **Huawei**

Version : **DEMO**

NO.1 In the Solaris vi editor, how to abandon the edited file and exit vi?

- A. :q!
- B. :q
- C. :quit!
- D. :exit

Answer: A

NO.2 eSight supports the unified management of Huawei servers, storage, virtualization, switches, routers, VLANs, firewalls, PON, eLTE, unified communications, telepresence, video surveillance and other equipment, as well as application systems and equipment room facilities, and pre-integrated with HP, Management capabilities of third-party mainstream devices such as Cisco and H3C.

- A. FALSE
- B. TRUE

Answer: B

NO.3 Regarding the deployment of WiFi, which of the following statements is reasonable? (Multiple choice)

- A. For the hotel lobby scene or large conference room scene, WiFi roaming is required. Therefore, fat AP can be selected. The SSID settings of each AP in the roaming area can meet the requirements.
- B. For the hotel lobby scene or large conference room scene, WiFi roaming is required. Therefore, a thin AP can be selected. In this case, the SSID settings of each AP in the roaming area must be the same.
- C. For the hotel room scenario, since WiFi roaming is basically not required between rooms, a fat AP can be selected. In this case, the settings of each SSID can be the same.
- D. For hotel room scenarios, since WiFi roaming is basically not required between rooms, thin AP can be selected. At this time, the settings of each SSID must be different.

Answer: B,C

NO.4 Is the following description correct? Before the upgrade operation, you need to stop the automatic saving function of the system through a command to avoid conflict between the upgrade operation and the automatic saving operation, which may cause the upgrade to fail.

- A. True
- B. False

Answer: A

NO.5 During the configuration of the EPON PPPoE service, what templates need to be configured to increase the MDU?

- A. DBA template
- B. Traffic template
- C. System parameter template
- D. Route template

Answer: A,D

NO.6 What are the VLAN attributes supported by MA5680T?

- A. MuX
- B. QinQ
- C. Stacking
- D. Common

Answer: B,C,D

NO.7 Is the following description correct? The idea of the FTTx device offline deployment plan is to generate offline device configuration data through network planning data. After the device is installed and powered on, the configuration data is automatically issued to achieve the purpose of plug-and-play equipment.

- A. False
- B. True

Answer: B

NO.8 What is the smallest constituent unit in the message constituent mechanism of the H248 protocol?

- A. message
- B. command
- C. Associated context
- D. transaction

Answer: B

NO.9 When deploying IPTV services on MA5600T, in order to better ensure the quality of IPTV services .

Which of the following services will have the highest QOS priority configuration?

- A. BTV, VOD and Internet
- B. BTV and VOD
- C. VOD
- D. Internet

Answer: B

NO.10 Regarding multicast and IPTV, which of the following statements is incorrect?

- A. Multicast refers to the form of point-to-multipoint communication in the network
- B. The core of multicast technology is to place the message copy work as close as possible to the receiver to complete it, reducing the data traffic on the network.
- C. Through the introduction of controlled multicast, the management and control of multicast users are completed on the DSLAM equipment,
- D. IPTV is a way of video on demand

Answer: D

NO.11 Is the following description correct? The speed standards of Fast Ethernet are 100Base-TX, 100Base-T4 with 100Base-FX.

- A. False

B. True

Answer: B

NO.12 Which of the following options is wrong in the description of XGS-PON data transmission?
(Multiple choice)

- A.** The data in the same gemport can only be received by one ONT/ONU.
- B.** The number of gemports contained in the same T-CONT cannot exceed twice the number of users under the ONT/ONU.
- C.** All services can be carried through the same T-CONT.
- D.** Under the same PON port, each user and each service must use different gemport channels to carry data.

Answer: B,D

NO.13 What remote acceptance functions can MA5600T/MA5680T provide?

- A.** PPPOE simulation test
- B.** Voice call simulation test
- C.** DHCP simulation test
- D.** BTV simulation test

Answer: A,B,C,D

NO.14 Regarding the difference between GPON and EPON, which of the following statements is correct?

- A.** GPON uses the extended OAM protocol to manage ONUs
- B.** The GPON protocol standard was proposed by IEEE, and the EPON protocol standard was proposed by ITU-T
- C.** GPON provides higher downstream bandwidth
- D.** Both GPON and EPON use single-fiber bidirectional data transmission. EPON uses 1490nm downstream wavelength to transmit data, and GPON uses 1550nm downstream wavelength to transmit data.

Answer: C

NO.15 When adding ont-lineprofile on the OLT, which need to configure? (Multiple choice)

- A.** Add gemport and configure gemport mapping relationship
- B.** Add DBA template
- C.** Bind tcont and DBA template
- D.** Configure the vlan of the ONTETH port

Answer: A,B,C

NO.16 Is the following description correct? MA5600T/MA5680T supports VLAN tag conversion. When SVLANs with different attributes create service flows through service-port, if tag-transform is set to default, there is no difference in tag conversion rules.

- A.** True
- B.** False

Answer: B

NO.17 At which layer does the ATM protocol work?

- A. Physical layer
- B. Link layer
- C. Transport layer
- D. Network layer

Answer: B

NO.18 Is the following description correct? VDSL2 provides uplink and downlink symmetrical/asymmetrical transmission rates on a pair of twisted pairs. The transmission distance is about 3km. The maximum downlink rate is 52M (symmetrical rate) and the maximum uplink rate is 12M (asymmetrical rate).

- A. False
- B. True

Answer: A

NO.19 Is the following description correct? The single board program package file released by MA5680T contains all the supported single board software. In actual use, there is no need to use so much single board software. Therefore, you can open a small package through the unpacking tool to improve the upgrade efficiency.

- A. False
- B. True

Answer: B

NO.20 When configuring traffic table for MA5680T, if only CIR is configured and PIR parameters are not specified, what is the PIR value by default?

- A. PIR=CIR
- B. $PIR = \min(2 * cir, 10240000)$
- C. Nothing
- D. $PIR = \min(1.5 * cir, 10240000)$

Answer: B

NO.21 According to the ITU-T G.984.x series of standards, what is the downstream transmission wavelength of the GPON network in nm?

- A. 1490
- B. 1550
- C. 850
- D. 1310

Answer: A

NO.22 Among the access technologies of the access network, which of the following access methods can provide the largest access bandwidth?

- A. ADSL

- B. VDSL
- C. GPON
- D. ADSL 2+

Answer: C

NO.23 Which of the following are the advantages of PON access technology? (Multiple choice)

- A. Save main thousand optical fibers and optical modules
- B. Low fiber loss and wide coverage
- C. OPEX is low
- D. Large bandwidth and good scalability

Answer: A,B,C,D

NO.24 Which of the following descriptions about the MA5680T GPBD board is wrong?

- A. Support Class B+ and Class C+ optical modules.
- B. Support 8 GPON SFP ports
- C. Support high temperature automatic shutdown
- D. Support maximum 1:64 splitting ratio.

Answer: D

NO.25 What are the characteristics of ATM cells?

- A. ATM cell is 53 bytes of fixed length
- B. Divided into letterhead and payload
- C. The header is 5 bytes
- D. The payload is 48 bytes

Answer: A,B,C,D

NO.26 Which of the following are common Ethernet switch VLAN link types? (Multiple choice)

- A. Mix
- B. Trunk
- C. Hybrid
- D. Access

Answer: B,C,D

NO.27 Which of the following is the correct configuration process for EPON ONT to go online automatically?

- A. Configure ONT->Configure the optical port of the EPON UNI port->Configure the EPON UNI port->Confirm the auto-discovered EPON ONT
- B. Configure ONT->Configure EPON UNI port->Configure optical port of EPON UNI port->Confirm the automatically discovered EPON ONT
- C. Configure EPON UNI port->Configure the optical port of EPON UNI port->Configure ONT->Confirm the automatically discovered EPON ONT
- D. Configure EPON UNI port->Configure ONT->Configure the optical port of EPON UNI port->Confirm the automatically discovered EPON ONT

Answer: B

NO.28 According to whether the UA2000 alarm is confirmed and cleared, what are its alarm states?

- A. Confirmed and cleared
- B. Unconfirmed and uncleared
- C. Unconfirmed and cleared
- D. Confirmed but not cleared

Answer: A,B,C,D

NO.29 Which of the following statements are reasonable for ONU deployment in POL scenarios?
(Multiple choice)

- A. The later maintainability should be fully considered when deploying the ONU, and the location where the ONU is installed should be convenient for maintenance.
- B. The installation location and method of the ONU need to consider multiple factors, and choose a more balanced solution among the factors.
- C. The closer the ONU is deployed to the information node, the better. The closer it is to the information node, the better the access features and advantages of the POL. Therefore, for the large-bay office scenario, the ONU is preferentially deployed on the desk surface or below.
- D. The security of the ONU needs to be considered during deployment, especially the risk of equipment heat dissipation and human damage.
- E. When deploying ONU, the later expansion needs should also be considered, especially when using information boxes to install ONUs, sufficient space for equipment installation should be reserved for future expansions.
- F. The deployment of ONU should also consider aesthetics. If customers have high requirements for aesthetics, installation methods such as under-desk installation and information box embedded in the wall can be optional options.

Answer: A,B,C,D,E,F

NO.30 Is the following description correct? In the GPON network, in order to avoid data conflicts and improve network utilization efficiency, the downstream direction adopts TDMA multiple access mode and arbitrates the data transmission of each ONU.

- A. True
- B. False

Answer: B

NO.31 In the GPON network, what will happen to the ONT's long light emission?

- A. Other ONTs under the entire OLT are disconnected
- B. All of the above are possible
- C. All business is normal, no impact
- D. Other ONTs under the same PON port are disconnected

Answer: D

NO.32 What type of optical module does Huawei GPON network mainly use?

- A. CLASS B

- B. CLASS A**
 - C. CLASS B+**
 - D. CLASS C**
- Answer: C***
